

Princeton CME, an accredited ACPE provider since January 2006, is committed to excellence in continuing education for all healthcare professionals.

Look at what some of our participants, partners, and faculty have to say...

Chronic Pain Management in Primary Care

"I want to express my appreciation to Princeton Media Associates for inviting me to participate in the teleconference, "Chronic Pain Management in Primary Care: Individualizing Pain Relief and Improving Quality of Life." Princeton Media did an excellent job of reviewing, organizing, and suggesting ways to improve the material presented to the target audience; providing pointers on how to make the recording of the presentation the best possible; and—most importantly—executing each live call with military precision. The extent of audience participation during live question-and-answer sessions and a follow-up e-mail I received from teleconference attendees requesting further educational material indicate to me that the program was successful.

In summary, Princeton Media carried out a professional program that enhanced continuing medical education regarding pain management. I would look forward to working with Princeton Media Associates in the future."

Howard A. Heit, MD, FACP, FASAM
Assistant Clinical Professor
Georgetown University School of Medicine
Washington, DC

Safe and Effective Management of Pediatric Asthma

"I received and read "Safe and Effective Management of Pediatric Asthma." It was a very erudite, concise, and factual presentation of current guidelines-based care. Dr. Blaisdell's commentary sends an important message that even as an experienced allergist I appreciated. The clinical reviewers should also be congratulated for their direction on the inclusion of information. It was helpful to have financial disclosures and conflicts stated at the outset—they are acknowledged by readers like me."

Anita Gewurz, MD
Section of Allergy/Immunology
Department of Immunology/Microbiology
Rush University Medical Center

Coalition of Rheumatology Educators (CORE™).

PRINCETON CME

“The University of Kentucky College of Medicine is extremely pleased to be part of this important educational initiative (CORE). Princeton CME has done an excellent job in identifying the educational need among clinicians, and we think the strategy for addressing that need is well-suited.”

Steven B. Scrivner

Associate Director
Continuing Education
University of Kentucky College of Medicine
Lexington, Kentucky

Diagnosis and Management of Constipation.

PRINCETON CME

“Princeton Media Associates provides quality evidence-based medical education that is rigorously researched and directed towards clinical decision makers. It is a pleasure to work with a company that has the highest commitment to providing and delivering useful medical information in a manner that is both convenient and useful to the broad audience.

It would be an honor to work with them again in the future.”

Brooks D. Cash, MD, FACP, FAGC

Chief, Gastroenterology Division and Colon Health Initiative
Associate Professor of Medicine, Uniformed Services
University of the Health Sciences
Specialty Leader, Gastroenterology
National Naval Medical Center
Bethesda, Maryland

Antibiotic Resistance in the Hospital Setting.

PRINCETON CME

“Princeton Media Associates was simply wonderful to work with and I would be very happy to work with everybody at the company should the opportunity arise. It was truly a pleasure.”

Robert P. Rapp, PharmD

Professor of Pharmacy and Surgery
University of Kentucky College of Pharmacy, College of Medicine
Associate Director for Clinical Services
Department of Pharmacy Services
University of Kentucky Medical Center
Lexington, Kentucky

Safe and Effective Use of Antithrombin Agents in Special Patient Populations.

PRINCETON CME

"I would like to thank Princeton Media Associates for allowing me to participate in such great educational programs. My slide decks produced in conjunction with Princeton Media are clear and well documented, and the participants of these educational activities are assured that the information presented is evidence based. The Princeton Media staff check every reference for accuracy. It is my pleasure to work with such a professional team.

Thank you to Princeton Media, and I hope we have the opportunity to work together again."

Geno J. Merli, MD, FACP

Chief Medical Officer
Senior Vice President for Clinical Affairs
Thomas Jefferson University Hospital
Professor of Medicine
Jefferson Center for Vascular Diseases
Jefferson Medical College of Thomas Jefferson University
Philadelphia, Pennsylvania

Targeting GERD Complications in Older Patients.

PRINCETON CME

"Having had the opportunity to work closely with Princeton Media Associates on numerous symposia and teleconferences, I can honestly say that they are a first-rate CE provider. I truly enjoy working with the staff at Princeton Media Associates, who have consistently made certain that no detail has been overlooked with respect to ensuring a highly professional and technical presentation.

The quality of CME offerings by Princeton Media is consistently high, utilizing the most contemporary evidence-based data delivered by top thoughtleaders in their respective fields of medicine. I am always honored to be asked to develop and deliver CME presentations for such an exceptional medical communications company, knowing that the final product will be something of which I am very proud to have been a part."

Randolph V. Fugit, PharmD, BCPS
